

Using Pivotal Cloud Foundry® Operations Manager 1.10.6 on Amazon Web Services April 27, 2017

A subscription license for “Pivotal Cloud Foundry Operations Manager” entitles the licensee to run Pivotal Cloud Foundry on Amazon Web Services (AWS). Below are instructions on how to enable Pivotal Cloud Foundry Operations Manager for deployment on AWS.

Instructions

1. Login to your AWS Account
2. Follow the PCF for AWS instructions at docs.pivotal.io
3. Use the AMI ID for your region from the list below:

- ap-northeast-1 (Tokyo): ** ami-ab3306cc **
- ap-northeast-2 (Seoul) : ** ami-b965b7d7 **
- ap-southeast-1 (Singapore): ** ami-0364df60 **
- ap-southeast-2 (Sydney): ** ami-16e6ee75 **
- eu-west-1 (Ireland): ** ami-5baaaa3d **
- eu-central-1 (Frankfurt) : ** ami-a62cf0c9 **
- sa-east-1 (Sao Paulo): ** ami-08d9b464 **
- us-east-1 (N. Virginia): ** ami-e6bdd9f0 **
- us-west-1 (N. California): ** ami-0b496e6b **
- us-west-2 (Oregon): ** ami-a31c82c3 **

Note: AWS Terms of Service are the sole and exclusive governing terms and conditions with respect to your use of AWS. Any entitlements you obtain under Pivotal’s End User License Agreement to your underlying Pivotal Cloud Foundry subscription license do not govern your use of AWS.
